Draw a picture of an animal that has a backbone.

Student Name:_____

Teacher's Name:_____

Due Date:_____

Partner's Name:_____

The Science Alliance of Tennessee, a coalition of 6 Science and Children's Museums, aims to foster children's curiosity, wonder and problem-solving skills using STEM curricula and community connections that set students on a positive trajectory of learning where they live and play. This project, the Tennessee Rural Impact Project (TRIP), was made possible in part by the Institute of Museum and Library Services.

Let's Explore

Animals with Backbones

Exploring...

Some animals have a backbone. These bones give support and allow the animals to move.

Bend over and feel the bumps on your back. Those bumps you feel are your backbone!

If animals have a backbone they are called a **vertebrate**.

Vertebrates can be:	 Reptiles	 Amphibians
	 Mammals	 Fish
 Birds		

What to do

Circle the vertebrates.
