Teacher's Name: _____

Due Date: _____

Partner's Name: _____

The Science Alliance of Tennessee, a coalition of 6 Science and Children's Museums, aims to foster children's curiosity, wonder and problem-solving skills using STEM curricula and community connections that set students on a positive trajectory of learning where they live and play. This project, the Tennessee Rural Impact Project (TRIP), was made possible in part by the Institute of Museum and Library Services.

Let's Explore

Finding Fall Constellations

Exploring...

It is a new season!

The stars that we can see in the night sky are new too.

Earth circles the Sun so we see new stars with a new season.

We can draw lines from star to star in the sky to make pictures called constellations.

The constellations can be people, animals, or things.

Each one has a story.

In Fall, we can find the stars that make Cassiopeia. She was a queen.

What to do

Find Cassiopeia in the Fall night sky with a partner!

Use the end of The Big Dipper to draw a line up to The North Star. From The North Star draw a line to the right. Find the W or M.

That is Cassiopeia!
