

Expanding...

Go outside with your partner.

Look for insects.

- What was the smallest insect you saw?
- What was the longest?

The Science Alliance of Tennessee, a coalition of 6 Science and Children's Museums, aims to foster children's curiosity, wonder and problem-solving skills using STEM curricula and community connections that set students on a positive trajectory of learning where they live and play. This project, the Tennessee Rural Impact Project (TRIP), was made possible in part by the Institute of Museum and Library Services.

Let's Explore

Investigating Insects: Sizes

Exploring...

Insects come in many shapes and sizes.

Most insects are **small**. They can be less than 1 inch long.

Some insects are **long**. They can be more than 12 inches long!

1. Cut out the ruler.
2. Measure the size of these insects with your ruler.

What to do

mosquito

ladybug

ant

bee

cricket

praying mantis
